

**When Teamwork
Really Matters.**

ARCHITECTURAL MILLWORK

Innovation in building
since 1952.

Beautify...

We began by supplying lumber, running trim and doors to local builders in Annandale, eventually settling in the scenic Shenandoah Valley and expanding our trim and door operation into the high end architectural mill shop that it is today. We create spaces that elevate. We furnish and install architectural masterpieces that equal or surpass what the architect and interior designer envisioned. You can turn to us for your most demanding architectural millwork projects for multi-family residences, hotels and other hospitality structures and buildings.

Imagine

We are AWI-QCP certified and employ some of the most talented and skilled millworkers in our region. Some of our high tech machines are the KOMO Mach One CNC router, the Weeke Venture 108 CNC router and the Holzma Optimat panel saw. The precise and skillful pieces these machines produce, provides a stunning display of human creativity in an artful space. From striking fireplace mantles and ornate cased openings and box columns, to elaborate door headers and grandiose exterior features, to the intricate detailed pieces that capture your eye... if you can envision it, we can supply.
